

Product Definition for Children's Smart Eye Protection Glasses

Smart eyewear product definition

Serial number	Definition	Specification	Remarks	
				
1	Basic Parameter	Temple Material	TR90, micro-transparent process effect	
2		Frame Material		
3		Lens	Electronic atomization lens	
4		Weight	32.6g	
5		Chip Manufacturer		
6	Hardware parameter	Chip Manufacturer	AD7003	
7		Battery Type	Lithium polymer	
8		Battery Capacity	Lithium polymer	
9		Battery Capacity	80mAh	
10		Usage Time	About 40H	
11	sensor	Distance Sensor	Supported	
12		6-axis Gyroscope	Supported	
13	Other Partmeter	Power On/Off Method	Open temple to power on, close temple to power off	
14		Charging Method	Magnetic charging, needs to be placed under the glasses, can be upgraded to a charging box later	
15		Charging Time	About 1.5H	
16		Waterproof Rating	IP64	
17		Standby Time	About 1 year	
18		Main Functions	Vision prevention and control / sitting posture correction	
19	Packing Partmeter	a		
		Package size (L*W*H)		
		Package weight		
		Carton size (L*W*H)		
		Carton weight		
		Packing quantity		
29	Main functions	Operation		
		Turn on	Open the temples and turn on automatically	Transparent lenses
31		Turn off	Close the temples and turn off automatically	Transparent lenses
		Distance correction	Distance from the object in front is greater than 25cm	Transparent lenses
33			Distance from the front is less than or equal to 25cm	Lens fogging
		Angle correction	Head tilt to the left or right within 30 degrees	Transparent lenses
			Head tilt angle to the left or right is beyond 30 degrees	Lens fogging
35	Head up and down angle movement		Transparent lenses
